

Q U A L I T Y

CCTF is engaged in the supply and distribution of pipe, pipe hangers, fittings, flanges and grooved products of various types and for a wide range of applications. Many CCTF products are installed by the power generation, petrochemical and process industries for which the governing codes and standards require considerable control, inspection and testing to verify the quality characteristics. To deal with these challenges, CCTF has implemented a quality program to the degree necessary to satisfy the contractors and owners, with emphasis put on areas such as review, purchasing, inspection and corrective / preventative action.

CCTF has established and maintains a documented Quality Management System in an effort to conform to product jurisdiction, customer requirements, and affect a continuous Quality Improvement Program. The Quality Management System reflects the philosophy and policy of CCTF in achievement of Total Quality and is designed to meet the requirements of ISO 9001-2000 Quality Standards. CCTF's experience in supplying significant projects demanding consistent quality products include Hibernia, Sable Offshore Energy Project, Terra Nova Alliance Project and the Irving Refinery Project. Current ISO Certificates of registration are available upon request.

ZINC PLATING PROCESS

THE PROCESS

TANK 1	Rust removal by industrial chlorhydric acid and oil removal with lye.
TANK 2	Rinsing with water after oil and rust removal.
TANK 3	Product is placed in the tank for zinc coating.
TANK 4	Second rinse in water.
TANK 5	Passivation by chrome acid to produce sealing coat.
TANK 6	Finished product is then air dried.

WELDING FEATURES

As in any welding situation, proper ventilation must be in place so that when welding, any fumes containing impurities are not inhaled.

Before welding any C.C.T.F. zinc plated pipe hangers, please check your local Workers Compensation Board welding procedures manual for ventilation requirements.

STANDARD & COMMERCIAL PIPE HANGERS

Pipe hangers offered in this section are designed to support insulated or non- insulated pipe allowing for vertical adjustment and limited movement in the piping system.

Material: Carbon steel, malleable iron, and 316 stainless steel are used in the manufacturing of these pipe hangers. Other materials are also available.

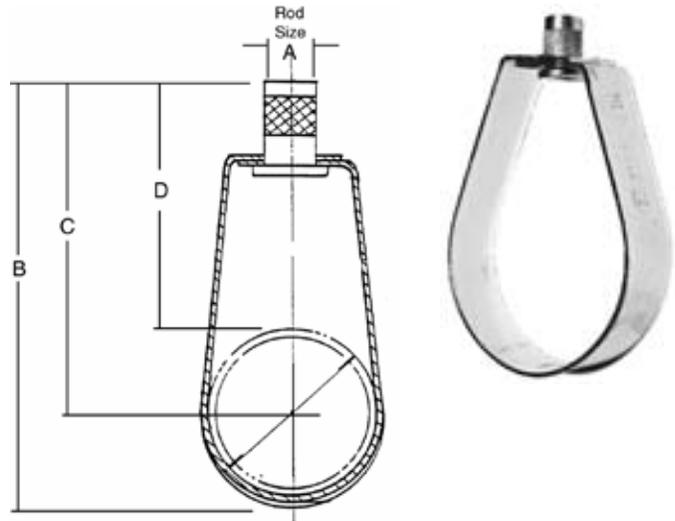

Finishes: Our standard hangers are supplied with an Electro-Galv. Zinc Coating. Some hangers may be supplied with a standard oil coated finish that is regularly referred to in the industry as BLACK. Other coatings available are hot dipped galvanized, standard Zinc Oxide primer or painted to your specifications. When hot dipped galvanized is ordered standard ZINC PLATED threaded parts will be supplied unless you request differently.

Approvals: Some items in this section are Underwriters Laboratory Listed and Factory Mutual Approved. All other items comply with Manufacturers Standardization Society MSS SP-69.

STANDARD & COMMERCIAL PIPE HANGERS

A 100 Adjustable Swivel Ring Hanger

Material:	Pre Galvanized Carbon Steel
Application:	Used for all general purpose and fire protection lines. The knurled nut allows for hanger alignment and adjustment after installation.
Approvals:	Underwriters Laboratory Listed, Factory Mutual Approved. Complies with Manufactures Standardization Society.
Ordering:	Specify figure number and pipe size.

FIRE PROTECTION & WATERWORKS HANGERS

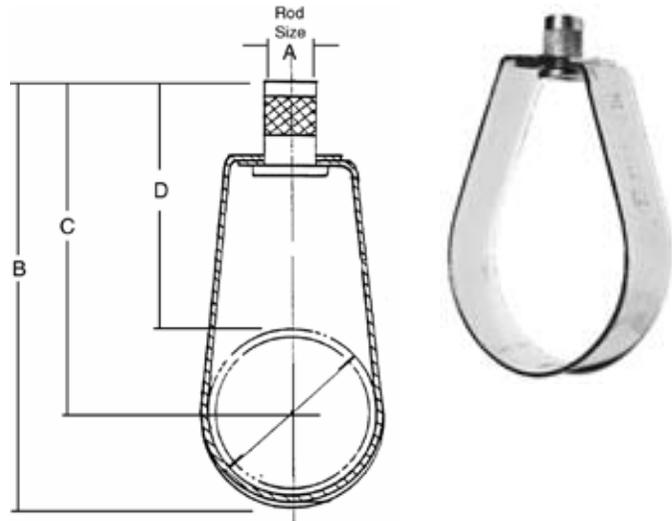

Hangers offered in this section are designed to support fire sprinkler pipe, and ductile iron pipe.

Material:	Carbon steel, malleable iron and 316 stainless steel are used in manufacturing these hangers. Other materials are also available on request.
Finishes:	There is an assortment of finishes used in the fire protection product line, Standard hangers are made from pregalvanized material . Waterworks clamps are furnished bare metal.
Approvals:	Some items in this section are Underwriters Laboratory listed and Factory Mutual Approved. All other items comply with Manufacturers Standardization Society MSS Sp-69.

FIRE PROTECTION & WATERWORKS HANGERS

A 100 Adjustable Swivel Ring Hanger

Material:	Pre Galvanized Carbon Steel
Application:	Used for all general purpose and fire protection lines. The knurled nut allows for hanger alignment and adjustment after installation.
Approvals:	Underwriters Laboratory Listed, Factory Mutual Approved. Complies with Manufacturers Standardization Society.
Ordering:	Specify figure number and pipe size.

FIRE PROTECTION & WATERWORKS HANGERS

B 20 Top Beam Clamp - Standard

Material: Ductile iron casting with a hardened steel set screw

Application: Designed for attaching a hanger rod to the top or bottom flange of a bar joist or other structural shapes where the thickness of the flange does not exceed 5/8".

Ordering: Specify figure number and rod size.

Approvals: Underwriters' Laboratory Listed and Factory Mutual Approved. Conforms with Manufacturers Standardization Society ANSI/MSS-5P-58 (Type 19 & 23), Install in accordance with ANSI/MSS-5P-69. Exceeds requirements of NFPA-13..

A 122 Underground Bell Clamp for Ductile Iron Pipe

Material: Carbon Steel

Application: Used as a safety device on a bell and spigot, or mechanical joint cast iron pipe where reversal stoppage or change in direction flow necessitates reinforcement. Two square plate washers supplied with each clamp.

Ordering: Specify figure number and pipe size.

These clamps are all sized to accommodate Ductile Iron Pipe only.

INDUSTRIAL HANGERS & CLAMPS

Pipe hangers and clamps offered in this section are designed for support and attachment of pipe to structural members. Roller hangers are designed to compensate for longitudinal movement due to the expansion and contraction of both insulated and non insulated (lower).

Material: Carbon steel is used in the manufacturing of regular pipe clamps in this section.

Finishes: All standard hangers available in this section are available in a standard black finish. Zinc plating, and hot dipped galvanized finishes are also available. Clamps in this section can also be either painted with a primer finish or can be completely painted to your exact specifications.

Approvals: As noted on each design these hangers are manufactured to a MSS SP - 69 standard.

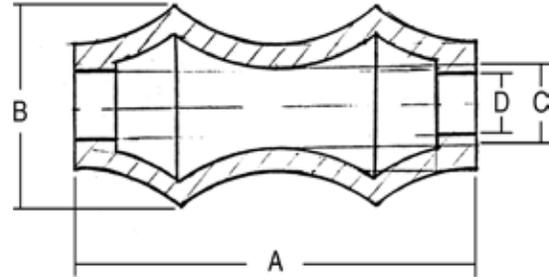

INDUSTRIAL HANGERS & CLAMPS

A 320 Pipe Roller

Material: Cast Iron

Application: Designed for supporting pipe runs with longitudinal movement also a steel rod axle must be used with this pipe roller.

Ordering: Specify figure number and pipe size required.

INDUSTRIAL HANGERS & CLAMPS

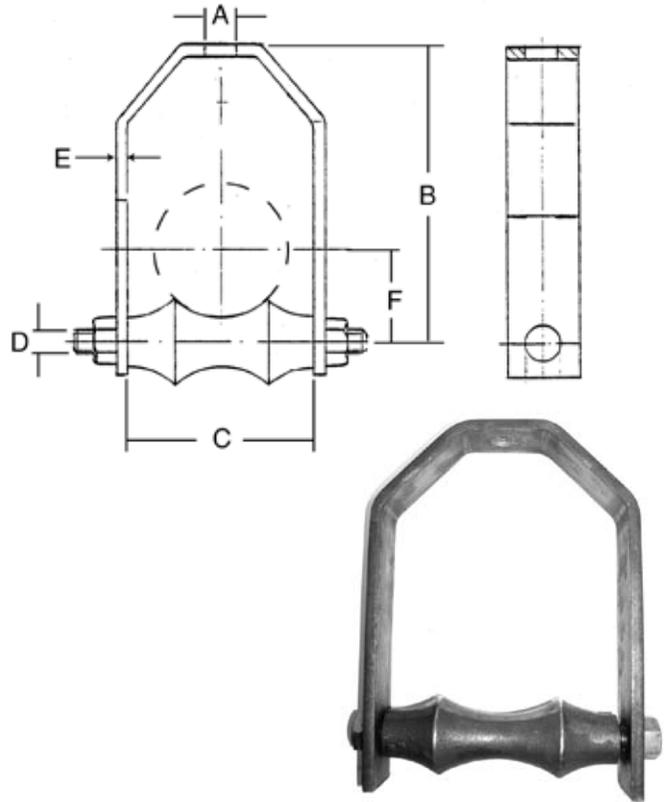

A 466 Standard Roller Hanger

Material: Carbon Steel body, cast iron roller.

Application: Designed for suspending pipe where longitudinal movement and vertical adjustment is required. When this hanger is used with insulation a pipe protection saddle must be used.

Ordering: Specify figure number and pipe size. **When insulation is being used take diameter of pipe, plus two times the insulation thickness to arrive at actual size required.**

Approvals: Complies with Manufacturers' Standardization Society SP - 69 Type 43.

INDUSTRIAL HANGERS & CLAMPS

A 497 Adjustable Pipe Roller Support

- Material:** Steel axle cast iron roller, malleable iron socket ends
- Finish:** Standard finish is bare metal, Zinc plated and hot dipped galvanized are also available.
- Service:** Designed for suspending piping where longitudinal movement and vertical adjustment is required. Threaded rod ordered separately.
- Ordering:** Specify part number, pipe size, insulation thickness and finish.

INDUSTRIAL HANGERS & CLAMPS

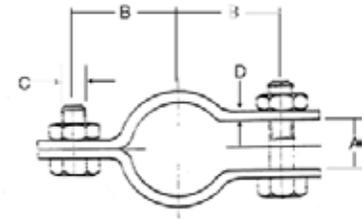

A 125 Standard 2-Bolt Pipe Clamp

Material : Zinc Plated Carbon Steel Sizes 1/2" thru 36". Also available in 316 Stainless Steel and Galvanized as well.

Application : Used to suspend non-insulated industrial pipe lines. Also used with A 344 Weldless eye nut. Eye nut allows movement of the pipe in a horizontal direction. Should not be used as a standard riser clamp

Ordering : Specify pipe size, figure number, and material.

Approvals : Complies with Manufacturers Standardization Society SP – 69 (Type 4)

INDUSTRIAL HANGERS & CLAMPS

A 430 Heavy Duty 2-Bolt Pipe Clamp

Material:	Carbon Steel
Application:	Designed for suspending non-insulated heavy duty pipe runs. Also to be used with a weldless eye nut and a welded eye rod.
Ordering:	Specify figure number and pipe size.
Approvals:	Complies with Manufacturers' Standardization Society SP - 69 Type 4.

INDUSTRIAL HANGERS & CLAMPS

A 62 Std. 3-Bolt Pipe Clamp

Material:	Carbon Steel
Application:	Designed for suspending heavy-duty, high-temperature pipe runs with up to 4" thick insulation.
Ordering:	Specify part number, insulation thickness, and pipe size.
Approvals:	Complies with Manufacturers' Standardization Society SP-69 Type 3.

INDUSTRIAL HANGERS & CLAMPS

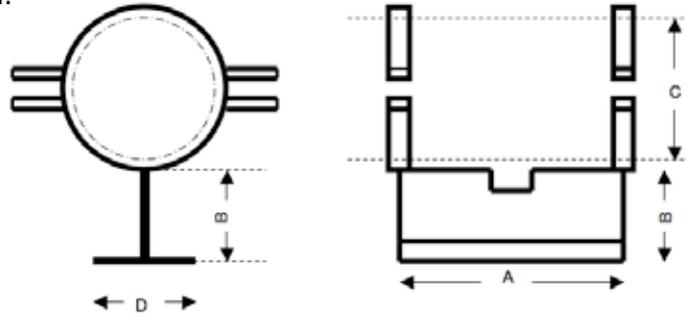

A 900 Pipe Shoe

Materials: Structural steel beam, Prime coated, and A 125 2 Bolt pipe clamp.

Finish: Prime coated

Application: For the Support of piping with longitudinal movement resulting from expansion & contraction. Maximum temp. range 750°F.

Ordering: Specify pipe size & figure number.

INDUSTRIAL HANGERS & CLAMPS

A 203 Insulation Protection Shield

Material:	Pregalvanized Carbon Steel.
Application:	Designed to protect pipe insulation when used with hangers.
Ordering:	Specify figure number, pipe size, and insulation thickness. When ordering look at the selection table below, find the pipe size required and the insulation thickness you have to determine the shield number you will require.
Approvals:	Complies with Manufacturers' Standardization Society SP-69 Type 40.

HANGER ATTACHMENTS & STRUT PRODUCTS

Hangers attachments offered in this section are designed to suspend pipe and or threaded rod from beams, concrete and other structural surfaces by bolting or welding. Strut products offered in this section offer a wide range of different products all designed for supporting pipe.

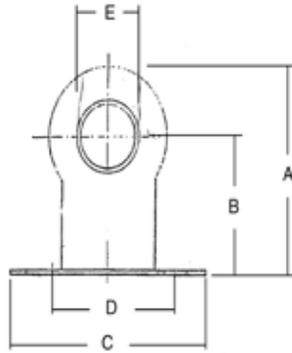

Materials: Carbon steel and Pre-Galvanized steel are the standard materials used for products in this section. All products in this section are also available in 316 Stainless Steel upon request.

Finishes: Attachments in this section are available in several different finishes. Epoxy coated, Zinc Plated, and standard black finishes are available. Strut and strut products are supplied standard galvanized finish.

HANGER ATTACHMENTS AND STRUT PRODUCTS

A 240 Standard Pipe Stay

Material:	Epoxy Coated Carbon Steel
Application:	Designed for use with Carbon Steel pipe or Copper pipe in residential or light commercial projects.
Ordering:	Specify figure number pipe size, carbon steel pipe or Copper pipe.

HANGER ATTACHMENTS AND STRUT PRODUCTS

A 330 Heavy Duty Beam Attachment – Less Bolt

Material: Carbon Steel

Application: Designed for attaching hanger rod to the bottom of structural steel where heavy loads and large hanger rod sizes are required. Can be welded in place in either upright or inverted position.

Ordering: Specify figure number, rod size.

Approvals: Complies with Manufacturers' Standardization Society SP - 69 Type 22.

THREADED PRODUCTS

Threaded products offered in this section are designed to reduce installation time.
A wide range of types and sizes are available for various applications.

Material: For maximum loading designs carbon steel is used in the manufacturing of standard threaded rod products. 316 Stainless Steel is used for Stainless Steel Rod.

Finishes: The standard finishes for mechanical supports are plain steel (oil coated) sometimes referred to as black. Electro Galvanized Zinc (ASTM A123) are all available from stock. 316 Stainless steel is also available from stock.

THREADED PRODUCTS

A 926 All Threaded Rod Zinc Plated

Material: A 1008 - 1018 Carbon Steel. Zinc Plated. Threads to ASME B.1.1 Coarse Thread (UNC) with 60° profile.

Application: Designed for use in pipe hanger assemblies or supporting standard pipe hangers to a structure.

Ordering: Specify figure number and finish.

THREADED PRODUCTS

A 425 Coach Screw Rod

Material: Carbon Steel Wire Zinc Plated

Application: Coach screw rods are used to support a hanger from a wooden joist. Coach screw rods have a lag thread on one end and a machine thread on the other end.

Ordering: Specify figure number and rod size required.

THREADED PRODUCTS

A 450 Steel Rod Couplings

Material: Zinc Plated Carbon Steel.

Application: Rod couplings are used to join two pieces of threaded rod together in order to support a pipe hanger holding pipe.

Ordering: Specify figure number and rod size required.

THREADED PRODUCTS

A W921 Machine Thread Rods Left and Right Threads

Material: A-1008-1018 Steel Wire.

Application: Designed for use in Pipe hanger assemblies. It can also be used with the A 333 turnbuckle. Rod has left hand threads on one end and right hand threads on the other end.

Ordering: Specify part number and rod size.
